SUMMARY

Full-stack developer with solid experience in both Front-end and Back-end development. Passionate about building reliable and scalable applications while maintaining high code quality. Known for strong teamwork, clear communication, adaptability, and the ability to work effectively under pressure.

PROFESSIONAL EXPERIENCE

Steel Best Buy - FullStack Developer Jun 2025 - Oct 2025

- Optimized the workflow of the Odoo vacuum module, improving processing efficiency by 70–90% and preventing excessive RAM usage during background operations.
- Developed and maintained Front and Back-end features to ensure seamless system integration and performance.
- Designed and improved APIs to optimize data communication and service performance.
- Created database schemas using Sequelize diagrams and documented API specifications for team collaboration.
- Enhanced UX/UI to improve usability and align with user requirements.

Tech Stack: Nest.js, Angular, Odoo, TypeScript, Figma, Node.js, PostgreSQL, PHP

Secure D Center - FullStack Developer Oct 2024 - Mar 2025

- Maintained and enhanced internal software systems, including migrating the entire UI to a new version.
- Improved system stability by identifying and fixing backend and API issues.
- Implemented responsive UI components to enhance usability across multiple devices.
- Collaborated with stakeholders to implement system improvements based on customer requirements and feedback.
- Developed and maintained both Front-end and Back-end to ensure seamless integration.

Tech Stack: Nuxt, Vue, TypeScript, Node.js, mongoDB

PROJECTS

Enterprise Resource & Workforce Intelligence Platform 2025 - Present

- Developed real-time features using WebSocket for instant payroll notifications and high-load attendance tracking from fingerprint scanner devices
- Designed and built a full-stack Microservices ERP platform with 3-tier separation: Angular frontend, NestJS API Gateway, and Go Core Service communicating via gRPC
- Engineered a high-performance Payroll Engine in Go using Goroutines for parallel processing, handling Thai tax brackets, social security caps, and provident fund calculations
- Applied BFF pattern in NestJS to aggregate data from multiple microservices into optimized response shapes for Angular
- Containerized the entire platform with Docker Compose, including environment-based config, health checks, connection pooling, and separate production overrides

Tech Stack: Angular, NestJS, Go, PostgreSQL, Redis, gRPC, Docker, Kubernetes

SKILLS

Languages	Frontend	Tools & Others	Backend & Databases	Soft Skill
1.TypeScript	1.Angular	1.Git	1.Nest.js	1.Adaptable
2.JavaScript	2.Next.js	2.Docker	2.Prisma	2.Communication
3.Python	3.Vue / Nuxt3	3.ERP (Odoo)	3.MongoDB	3.Collaboration
4.C++	4.Tailwind	4.Figma	4.PostgreSQL	4.TeamWork
5.PHP	5.CSS/SCSS	5.MQTT	5.Node.js	5.Enthusiastic

EDUCATION

Bachelor of Engineering 2021 - 2024
King Mongkut's Institute of Technology Ladkrabang (KMITL)
Computer Engineering

Activities

- Staff – CE Smart Career 2023, KMITL
- Staff – Chongkho Night Engineering Festival, KMITL
